

## Care instructions for bed linen by Christian Fischbacher

**Correctly cared Christian Fischbacher bed linen remains beautiful for a long time and gives you enjoyment over years.**

Always follow the care labels attached to the individual items.

It is recommended that you wash your new linens prior to using them for the first time.

We recommend that you wash whites, light colors and dark colors separately. Close buttons or zippers so that items don't become entangled, which could distort the shape of the bed linens.

### Washing instructions

Wash all Christian Fischbacher bed linens in warm water (60 °C/140 F) with non-detergent soaps such as linen washes or laundry soaps for infants. These soaps should not contain optical brighteners bleach which cause colors to fade.

Never overload your washer or dryer and do not mix bed linens with bath towels, denim or other household laundry. See your manufacturer's instructions for load volumes.

### Dryer instructions

Christian Fischbacher cotton bed linens can safely be tumble dried on medium heat, do not tumble dry until fully dry. Remove while still slightly damp. Shake lightly to restore the shape and smooth out creases.

### Ironing instructions

Our fabrics are best ironed on the back side on medium heat while slightly damp. This retrains the maximum shine on the satin finishes. Jersey needs no ironing.
