CHAMPAGNE  
COLLECTION

## CHAMPAGNE COLLECTION

Born from the meeting of oenologist Bruno Paillard and master silversmith Puiforcat, the Champagne collection celebrates the art of fine taste and offers champagne experts and ardent aesthetes an entirely new tasting experience.

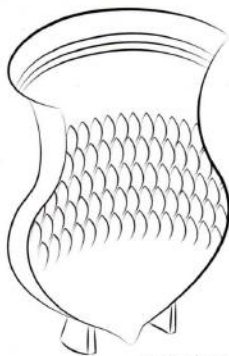

The collection was created around an iconic item: a sterling silver champagne beaker. This unique vessel is contoured to exalt the sublime majesty of the sparkling nectar.

A hand-blown crystal dagger and a glass, a bucket, a champagne stopper and various serving accessories round out this collection, fully celebrating the ritual of champagne.

The flared rim facilitates tasting.

A narrow neck allows the flavors to waft forth and release their aromas.

The generous volume of the base allows the champagne to breathe.

Three engraved lines represent the three varieties required to produce excellent champagne (Chardonnay, Pinot noir and Pinot meunier).

The guilloche attracts and redistributes the bubbles. Light entering the beaker reflects off the multifaceted surfaces to reveal an array of golden hues.

The tip of the base produces a geyser effect, heightening the bubbles' aromatic intensity as they bounce vertically off the edges of the beaker in dense formations.
